E-mail : aashieshrrsoni@gmail.com
Mobile: +91 9422808696

Dedicated, organized technical project management expert with 20 years of application development expertise, resulting in a strong combination of technical skills and project management. A natural leader with a high degree of flexibility and a proven ability in managing small and large teams.

Extensive experience in IT architecture, design, and development, specializing in implementing Blue-Green IT strategy solutions to ensure seamless application deployments with zero downtime, enhanced scalability, and risk mitigation. Expertise in designing and executing Green IT strategy solutions, focusing on energy-efficient computing, cloud optimization, and sustainable software development practices to reduce the environmental footprint of IT systems. Adept at leveraging microservices architecture, containerization (Docker, Kubernetes), CI/CD pipelines, and cloud-native technologies to drive innovation and operational efficiency. Testing of Microservices REST API and SOAP, Data Pipelines, ML model performance testing with proficiency in Automation using terraform, Junit, Jira Xray.

Experience in leading large scale transformational, global exposure in executing projects from multiple and different geographic location- USA, UK, SA, Israel and India.

I can add the following value to the team	Core Strengths
➤ With my 12 years in Technical portfolio manager, 4 years of project lead, 7 years of DB design, development and testing experience. ➤ Strong working experience in Feasibility Analysis, Gap Analysis, Tool Selection, Framework Selection, Technology Selection, QA process, Wireframes. ➤ Managed Java, Dot Net, Open Source, SFDC projects. ➤ Worked on SaaS web-based and CRM(salesforce) applications. ➤ Strong knowledge in product and project management. ➤ Strong working knowledge in Scrum, Waterfall & Agile. ➤ Team building, motivation, and leadership. ➤ I am a people's person who values and nurtures long-term business relationships with customer/client and team members. ➤ Hands on experience in AWS Cloud solution and infra provisioning and operating infrastructure	➤ Technical Assessment & Feasibility Analysis ➤ Development best practices such as Agile, Coding Standard, QA process, Work Development Flow, and CI/CD, etc. ➤ Project Plan and Estimation ➤ Risk Management and Mitigations Plan ➤ Platform migration, Data Migration ➤ Budgeting & Cost Control ➤ Team & People Management ➤ Build & Maintain Quality Strategy ➤ Part of Blue-Green IT strategy solution implement and Green IT strategy solution.

Work Experience

Company Name: Nice Actimize, Pune

Pune (April 2017 to till now)

Designation: *Technology Manager* (Reporting to Sr Director and Division Director)

Key Responsibility:

- Managing multiple Fraud and AML products, as well as Maintenance & Support initiatives.
- Leading multiple team of total 25-30 professionals, including architects, developers, testers, and business analysts, overseeing products and projects generating \$12 million in annual revenue.
- Led end-to-end Quality Engineering delivery, ensuring alignment with organizational goals and driving excellence across testing life cycles for complex enterprise solutions.
- Established scalable test management frameworks and drove continuous improvement of testing strategies, tools, and processes for maximum efficiency and coverage.
- Involved in GenAI initiative and emerging tech integration into QA processes, unlocking intelligent automation and cognitive QA capabilities.
- Directed robust test automation initiatives, implementing reusable, scalable automation frameworks (API, UI, DB , Authentication and Authorization integrated into CI/CD) to accelerate delivery.
- Managed cross-functional stakeholder relationships, leading high-level quality discussions and ensuring proactive alignment with product and engineering teams.
- Drove strategic QA initiatives and GTM enablement, leading launch and adoption of next-gen testing capabilities across global teams.
- Provided accurate test estimations and resource forecasts, supporting Agile and DevOps delivery with well-calibrated QA timelines and budgets.
- Enabled successful Vendor engagements, contributing to RFP responses and technical proposals that secured deals.
- Consulted on industry best practices, advising on automation frameworks, AI-driven QA solutions, and test strategy optimization for diverse technology stacks.
- Built and monitored key QA metrics dashboards, leveraging data-driven insights to continuously enhance testing effectiveness and product quality.
- Innovated in performance testing strategies, deploying modern tools and approaches to ensure scalable and resilient system behavior under load.
- Making strategic decisions on hiring, resource allocation, performance appraisals, and defining Key Result Areas (KRAs) to align team goals with organizational objectives.
- Designing secure and seamless connectivity between on-premises and cloud env. using VPNs, Direct Connect solutions.
- Implementing cloud migration strategies, including re-hosting, re-platforming, and re-architecting legacy applications for hybrid cloud environments.
- Leveraging Kubernetes (AWS Cloud EKS) and container orchestration to deploy and manage workloads across hybrid cloud environments efficiently.
- Developed compelling proposals showcasing testing capabilities, value-adds. Articulated testing frameworks, tools, and differentiators
- Integrating DevOps and CI/CD pipelines across hybrid environments, enabling automated deployments, testing, and rollback strategies for high-velocity software delivery.

Achievements:

- Process improvement within the team for Project Management Reports, Release Management, Achieving SLA etc.
- Define and implement Quality maturity plan
- Implement both high availability (HA) and Resiliency cloud solution
- Automating disaster recovery (DR) procedures and process.
- AWS cloud costs control within budget and try and find means to reduce the solution costs.

Company Name: Zensar Technologies Ltd. Pune

Pune (October 2006 to March 2017)

Key Project # Cisco ODC

Pune (Jan 2016 to March 2017)

Designation: Project Manager /Sr. Test lead (Reporting to AVP)

Key Responsibility:

- Engaging with strategic clients daily to understand their business needs and provide technology solutions and resources.
- Architecting and implementing Big Data solutions with seamless integration of Oracle Eloqua Marketing, Marketo, and Salesforce (SFDC) to enable real-time data processing, analytics, and customer insights.
- Building a centralized data lake architecture using Data Lake, integrating unstructured data from Marketo, and SFDC for advanced analytics.
- Ensuring timely deliveries within budgets while maintaining the quality standards, SLAs, and profit margins.
- Contributed to RFP responses by defining QA strategy, automation approach, and effort estimation.
- Provided quality engineering inputs for solutioning in presales and bid response phases.
- Maintaining the Sprint backlog based upon sprint planning, sprint review, and sprint retrospective meeting.
- Project setup on JIRA and managing scrum board.
- Preparing weekly and monthly project status reports for stakeholders.
- Decision-making for hiring, resource allocation, performance appraisals, and defining KRA.
- Track development metrics in a clear and transparent manner.
- Managing complex dependencies between internal Scrum teams, and those between teams and third parties
- Change management, incident management, and release management for various projects across the Cisco
- Responsible to manage client demand vs. availability capacity

Achievements:

- Planned and executed several project transitions of resources to avoid attrition/layoffs and keeping revenue intact.

Key Project # CREE Ruud lighting

Racine USA& Pune (Dec 2014 to May 2015)

Designation: Project Co-ordinator / Lead (Reporting to Delivery Manager)

Key Responsibility:

- Architect small to very high traffic websites and ensure end-to-end Delivery.
- Building scalable ETL workflows using Apache Spark, Informatica and Oracle Data Integrator (ODI) to extract, transform, and load structured/unstructured data from Oracle Apps into DW/BI solution.
- Ensuring data consistency and governance using Oracle Master Data Management (MDM), Data Quality tools, and metadata management frameworks.
- Leading the process from the starting point from selecting the right database, platform, and other infrastructure as needed for development projects.
- Coach development teams about the coding framework and the best practices.
- Define the best practices of coding with the changing web standards for websites to stay on modern and robust platforms.
- To translate Business Requirements into technical needs and build docs and specs accordingly.
- Decision-making for hiring, resource allocation, performance appraisals, and defining KRAs.

Achievements:

- Setup documentation templates for the projects. Created blueprint for the new product which was later used as a final document for the project work. And also implemented bug tracking tool for QA team to maintain the smooth execution of error reporting.

Key Project # Prudential Plc

Pune, Reading (UK) (March-2009 to Sept 2011)

Annuity product (AQUA/WEQS) Quotation/Policy Management

Designation: Project Co-Ordinator (Reporting to Program Manager)

Key Responsibility:

- Gather high-level requirements & creating business requirement documents.
- Writing user stories and maintaining the product backlog.
- Creating a work schedule and milestones. Project status reports to stakeholders.
- Interaction with business teams. Managed Onsite / Offshore resources..
- Ensure deadlines, quality delivery, and project walkthrough.

Achievements:

- Coached new team members for agile processes and scrum methodologies.
- Executed every delivery successfully and won three "you are a star" quarterly awards.

Designation: Investec Bank (Fiscus Ventures)	Pune, SA (March-2008 to Sept 2009)
---	------------------------------------

Key Responsibility:

- Identifying the technology competencies needed in a specific project.
- Writing user stories , business use cases and maintaining the product backlog.
- Creating a work breakdown plan and milestones for each delivery.
- Project status reports to stakeholders..
- Ensure deadlines, quality delivery, and project walkthrough.

Achievements:

- The process implemented for accepting Change Requests from the client.
- Project estimation templates are designed for all verticals.

Key Project # Prudential Plc	Pune, Reading (UK) (March-2009 to Sept 2011)
-------------------------------------	--

Range Planner (ETL/BI Analytics solution)

Designation: *Module Lead*

Key Responsibility:

- Handle complicated tasks and functionalities.
- Review the project related documents PRS/SRS/SDS (Requirement document, Functional Specification).
- Create a DB architecture, Code review, and deployments.
- Manage team Senior and Junior DB developers within a project assigned.
- Interpersonal relationship within our - team members, among peers, with manager.
- Allocation of resources for execution plan on weekly basis as module/cluster owner.
- Reporting status to client and Project Manager from Test Management Tools (QC)

Achievements:

- Projecting/estimating the time required for module wise delivery.
- Preparing Build acceptance document and RCA for escape bugs.

Company Name: MAGIC Software Enterprise (I) Pvt Ltd.	Pune (Jan 2004 to June 2006)
---	-------------------------------------

Designation: Sr. QA & Project Lead (Reporting to Manager)

Key Responsibility:

- Handle complicated tasks and functionalities.
- Database Design and setup a coding framework.
- Manage Junior and Senior developers within a project assigned.
- Code Review and Deployment.

Achievements:

- Two times awarded for "Best Performer" of the organization.
- Finalization of coding standard in the organization.

Academics

- Master's degree in Computer Management (MCM) from Nagpur University.
- Bachelor's Degree in Commerce from Nagpur University.

Certifications

- AWS Architecture certification (LinkedIn) – 2020 year
- PMP 35 PDU's Certificate from PMI - 2009-2010 year
- Certification VB.NET and ASP.NET from KICIT, Nagpur. - 2003 year
- Honors Diploma in System Management from NIIT, Nagpur. . - 1998 year
- Certification "O" level from DOEACC, New Delhi.

Technical Skills	
Domain Working Experience	Banking (Fraud, Anit Money Laundering, Card & Payment), forex portfolio, Insurance (Annuities), Retail , Manufacturing and Utility.
Technologies (Lang./framework / tools)	Java, JavaScript, and Node JS, eDeveloper(Magic), VB, D2k ,Query Surge, TOAD ,SFDC (salesforce) CRM and migration, GIT, SVN , AWS cloud (SaaS, MaaS,IaC),
AWS Resource/ Services	EC2,S3, IAM User, Group, Policy, Athena, API Gateway, DynamoDB, Lambda, Step Machine, , Events, Security Group, Glue VPC, Subnet, IAM (roles & policy)
Open-Source	Magento, , TFS 2010, VSS, XMLSpy, Star UML and TOAD, Postman Tool, Swager Jenkins, Terraform, JFrog, GitLab, SVN
Database	MySQL, Postgres SQL, Oracle, MS SQL, DB2 and Pervasive SQL
PM Methodologies	Waterfall, Agile – Scrum, Kanban
Project Management Tools	JIRA, , Salesforce (Admin), Smart sheet

Declaration

I hereby affirm that the information in this document is accurate and true to the best of my knowledge.
