

Curriculum Vitae

Name: Nillohit Banerjee
Date of birth: 04 – Oct – 1987
Address: 702, Christina, Nyati Esplanade, Bavdhan, Budruk, Pune, Maharashtra 411021
Nationality: Indian
Marital Status: Married
Pan-card Number: APWPB1035K
Passport Number: M9627355

Academics

2010 8.39 -Bachelor of Technology – Computer Science
B.P.P.I.M.T under West Bengal University of Technology
Kolkata, W.B., India
2006 83.5% -WBCHSE (10+2), B.P.C.S. Gvt.High School, Kolkata, W.B., India
2004 88.12% -WBBSE (10), B.P.C.S. Gvt.High School, Kolkata, W.B., India

Publication

A novel steganography technique through variable bit manipulation

Published in:

[Emerging Trends and Applications in Computer Science \(ICETACS\), 2013 1st International Conference on](#)

Date of Conference: 13-14 Sept. 2013

Technical Acquaintance

Languages	Java 8, C, JavaScript, Python 3.7, Scala 2.11
IDE & Tools	Eclipse, SQLDeveloper, Microsoft Visio, xcode, IntelliJ, Visual Studio , Postman , SoapUI
Web Servers	Apache Tomcat, WebSphere, Jetty
Framework	Spring, Spring boot, Spark
Cloud	AWS (S3, Lambda, DynamoDB, Glue, Step Function, API gateway, SQS)
Code Management	SVN, Git
Special Interest	Data structure, Algorithm, Design pattern and principals, Data mining algorithms, Clustering based machine learning, Steganography, Bioinformatics ,System design
SDLC models	Scrum, Agile, Waterfall, RAD
Code quality tools	SonarQube, FindBugs

Work Experience

- Dynamic career of 9 years with rich experience & year-on-year success in Software Engineering, System design, Product Development, Application Support and maintenance
- Proficient in design and development of software products from requirement analysis to system study, designing, coding, debugging, documentation and implementation & maintenance
- Successfully completed various projects as Auto Tracking, BPM Services, Global Rewards, Customer help desk and OTP generation, Multi-tenant Configuration Management System, currently working on data pipeline for AML system.
- Expertise with different business functionalities while working in various business-complex initiatives and BAU (Maintenance) tasks with Citi Bank, Bandhan Bank , NICE Actimize
- Impressive fast track career driven by challenges and desire to be successful, with an expertise in leading multiple projects, also successfully completed Software Application Development Projects
- Diligent in managing Software Development Lifecycle (SDLC) including requirement analysis, design, testing and maintenance phases
- A keen communicator with honed interpersonal, problem solving and analytical skills

Organizational Experience

- Since May'19: NICE Interactive Solutions India Pvt. Ltd. as Specialist Software Engineer
- Jun'18-May'19: SunGard Solutions Software India Pvt. Ltd. (Currently FIS) as Specialist Product Development
- Mar'16 – Jun'18: FIS Payment Solutions and Services India Pvt. Ltd as Senior Software Engineer
- Dec'10 – Feb'16: Tata Consultancy Services Limited as IT Analyst

Relevant Project Experience

Project: Data pipeline for cloud base AML system
Period: Since May 2019
Technology: Scala, Python, Java, Aws (Lambda, Glue, S3, Cloudwatch, Stepfunctions), Spark
Description: Performing flattening of datatype for on premise system transaction tables for ML models on cloud.
Role: Individual contributor (System design, Coding, Best coding practice)

Project: Multi-tenant Configuration Management System
Period: April 2018 – May 2019
Technology: Core Java, J2EE technologies (Spring Boot service, Spring MVC, Oracle 11g)

Description: A product suite contains multiple point products, which individually requires huge number of system properties. It's difficult for any individual customer to maintain the all the system property we are providing a web project where all the properties will be stored and customer can update, edit or add properties from a web console.

Role: Solution Architect, Senior Developer, Code reviewer

Project: Auto track

Period: Jan 2017 – Mar 2018

Technology: Core Java, J2EE technologies (JSP, jQuery, Require js, Spring Boot service, Handlebar, Oracle 11g)

Description: Creating in-house product solution for tracking various item related to commercial banking card, pin, check book, etc for clients.

Role: Senior Developer, Code reviewer

Project: BPM Services

Period: Feb 2016 –Dec 2016

Technology: Core Java, J2EE technologies (JSP, jQuery, Require js, Spring Boot service, Spring Batch, Spring Scheduler, Free Marker, Handlebar)

Description: Creating multiple micro services which will be by BPM system to integrate with third party systems. Created multiple small-scale Spring MVC project to integrate with BPM system and micro services mentioned above

Role: Senior Developer

Project: Global Rewards

Period: Jul2014 – Feb -2016

Technology: Core Java, J2EE technologies (JSP, Struts2, jQuery, Spring Injection)

Description: When customer tries to collect credit card reward point an SSO need to happen to go to third party application.

Role: Offshore Developer & Team Lead

Project: Customer help desk

Period: Jan 2013 – Jun2014

Technology: Core Java, J2EE technologies (JSP, Struts2, jQuery, Spring Injection)

Description: When any bank customer faces a problem, they call Citi help desk for help. At that time help desk need to fill up a form based on customer request. The form is totally dynamic depending on the customer's answers of the questions.

Role: Offshore Developer & Team Lead

Project: OTP generation

Period: Feb 2011 – December 2012

Technology: Core Java, J2EE technologies (JSP, Struts2, jQuery, Spring Injection)

Description: When any bank customer tries to do a high-risk transaction, an overlay will open with a list of customer phone number. On selecting a specific phone

number an OTP will be generated. The customer then needs to re-enter that OTP to do a successful high-risk transaction

Role: Offshore Developer

Key Result Areas:

- Undertaking the project with the available inputs for the requisite output; creating system design documents, providing technical guidance/support to the Application Development Team for testing, troubleshooting and debugging of applications
- Undertaking code review, debugging and troubleshooting the application; extending post go-live and application maintenance support to the client
- Developing software solutions by studying information needs, conferring with users, studying systems flow, data usage, and work processes
- Understanding process requirements and providing use cases for business, functional & technical requirements
- Interacting with users for requirement gathering; preparing functional specifications and low-level design documents
- Working with product management and engaged internal customers to understand requirements and gather feedback on solutions
- Performing analysis, design, verification, demonstration and maintenance of products in a process-driven, team environment
- Steering improvement initiatives with focus on streamlining and managing processes with proactive planning, introduced new concepts, steering change

Notable Accomplishments Across Career

- Accomplished with multiple time on spot performer award
- Grabbed TCS – Citi relationship certificate in 2013
- Recognized as Highest Band (A) and rating thrice at TCS in 2011 2014 and 2015
- Achieved Ace of the Quarter in Banking technology and Highest Band (Exceptional) at FIS in 2017
- Attained ILP Kudos in 2010

Academic Achievements

- 2010 GATE percentile 95.9
- 2003 Performance grade 'A' in Science Talent Search Examination conducted by Jatiya Vijnan Parishad associated with Indian Science Congress Association
- 2002 Performance grade 'B' in All India Science Teachers Association (Wb Branch)
