

Subrata Biswas

IT Professional with 20+ years of insightful experience looking for senior leadership role in Software Delivery/Program Management, Testing CoE/Practice Solution Manager, Sr. Test Architect, Performance Engineering, Application Cyber Security, Test Delivery Management, Agile CoE/Transformation, Digital Testing Transformation

Roles performed in last 15 years

J2EE Architect, Delivery/Program Manager, Senior Test Architect, Test Practice Solution Manager, Project Manager, Product Owner

Proven Expertise In

- Automation Test Architect • Application Security Test Architect • Performance Test & Engineering Architect • SAAS based End to End Testing Tool Implementation
- SDET Implementation in Agile Methodologies • DevOps in Testing stream • Hadoop Test Architect & Consulting
- Delivery/Project Management • Test Management and Test/QA Consulting • Practice Leadership • Digital Assurance (Strategy and Implementation) • Pre-Sales Activities – RFI, RFP and Proposals Solutions • Agile Methodologies • People Management • Quality Assurance • Project Account Management (Accrual, Invoicing, MIS) • Product Development Lifecycle • Business & Functional Analysis • Estimation and planning

Major Achievement

- ⇒ Saved 2 Million Euro for RENAULT providing solution through root cause analysis of application performance issue
- ⇒ Build tool to convert Oracle based two tier architecture application to 3 tier J2EE application using Oracle ADF framework
- ⇒ Build Environment Management Tool (Jarvis) for BOFA, which reduced 70% OPS cost YOY
 - Saved \$.6 Million by means of automation – 2012 for Bank of America
 - Saved \$.9 Million by means of automation – 2013 for Bank of America
- ⇒ Build Mobile Lab across Chennai and Hyderabad for Bank of America and Mobile automation framework using Monkey Talk
- ⇒ Build SaaS based script less automation tool for Zensar for providing End-To-End test capabilities to support UNIT test, Functional Automation, automation for Services(Rest, Micro Service JMS, MQ and WSDL web service), Performance script automation, Security(SAST & DAST) automation. Test Data Management(TDM) integrated
- ⇒ Managed Testing solution with revenues ranging from \$20M to \$65M
- ⇒ Concluded 4 \$5M business proposal along with several small proposal ranging from \$.5M to \$2M as part of Zensar RFP / RFI response

Capacity Building

- ⇒ Coach and mentored 300+ associates for Zensar
- ⇒ Build Performance Engineering team in BOFA
- ⇒ Coach and mentored 300+ associates for Zensar
- ⇒ Build Non-Function Testing(Performance Testing & Engineering, Application Testing) capabilities
- ⇒ Coach 100+ associates to enable Digital Testing, Intelligent Automation, Cognitive QA

Career Summary

I am working in the IT Industry for more than 20 years' experience with over 6 years' in development, 4 years' in J2EE architect and 10 years' in Project/Delivery Management, Test Management, Agile Practice, End to End Test automation solution provider and Test Practice Management. My career has spanned across multiple roles and I have major experience of directly working with onsite customers (South Africa, UK and USA). I have managed large deliveries for some of our key Automobile, BFSI, retail customers and have consistent track record of delivering significant positive impact on key KPIs, revenue, gross margin and customer satisfaction. As Testing practice Manager and Testing solution provider I have contributed significantly in business growth and Digital Transformation in South Africa and UK territory. I have been part of the strategic teams to build futuristic testing solutions. I am a leader who believes in "leading from the front" and always been a great team man and motivator. With large array of skills and strong interpersonal skills I am always ready to roll up my sleeves to deliver the task and achieving the business objectives.

Core Competencies

- ⇒ Hands on Experience with Software Quality, DevOps areas
- ⇒ Role of Lean and Automation Transformation architect
- ⇒ Building solution across testing Life cycle in Digital Testing, Intelligent Automation, Cognitive QA etc.
- ⇒ SME in Strategy, Process consultancy, Delivery Excellence, Operation excellence and Competency development
- ⇒ Engaging with Industry Analyst – Gartner, Everest for vendor briefings and solution overview
- ⇒ Delivered end to end solutions for all QA phases like Functional, Automation, Cross Browser, UX, Performance and Security using Agile Methodologies in Agile methodologies
- ⇒ Worked as QA Architect, Product Architect for multiple Testing Platforms - “Cloud based Regression Automation Testing Tools”, Product development and Testing.
- ⇒ Expert in futuristic testing with AI/ML driven, Shift-left, No Code Automation and Cloud/SaaS based Testing
- ⇒ Strong experience in Retail and provided various testing solutions for applications built on ecommerce platforms like Hybris, SFDC, PEGA and Magento.
- ⇒ Delivered multiple solutions for complex testing problems like pdf validations, Large data sets, email validations, multi node-multi browser-multi platforms testing
- ⇒ Successfully implemented TDD and BDD methodologies at multiple customers
- ⇒ Implemented end to end CI/CD and CA process across multiple projects.
- ⇒ Strong experience with Application Security Architect & Assessment (SAST, DAST, IAST, MAST, Active, Passive, VA & PT), Architecture review from Security aspect, SecDevOps implementation
- ⇒ Strong Experience in Performance Testing and Engineering – Capacity Planning, Load Modelling, Strategy & Planning, Analysis, Reporting and presenting to stakeholders, Root Cause Analysis through deep diagnostics & Profiling
- ⇒ Strong experience implementing SDET in Agile Methodology

Awards and Accolades

- ⇒ Best Global Practice manager to build a team in quick around time within limited budget in first quarter of 2015
- ⇒ Best Manager in South Africa region during 3rd quarter of 2015 for winning a new client account targeted for long time to entry and delivered the first project smoothly before the target date, resolving
- ⇒ Signing Star trophy for 2012.
- ⇒ Winning star for the year 2013.
- ⇒ Platinum awards – 2
- ⇒ Gold awards – 3
- ⇒ Silver awards – 3
- ⇒ Bronze award – 1
- ⇒ Pride Nomination Award for excellent performance on Innovation and Results

Leadership Strengths

Communication	People Mgmt.
Quick Learner	Transparency
Goal Orientation	Team Motivation
Customer Mgmt.	Problem Solving
Positive Attitude	Creativity
Business Acumenn	Stakeholder Mgmt.
Agility	Coaching

Technology Landscape

Automation – Selenium, Selenium WebDriver, Appium and Selendroid, QTP/UFT, Egg Plant, Test Magic, Test Complete, Prover, Sauce Lab, browserstack

Application Security – Fortify SCA, WebInspect, Burp Suite Pro, Wireshark, Arachni, SonarQube, Nmap, Metasploit, Nessus, Qualys, Kali Linux Penetration Toolset

Performance – ALM PC, Load Runner, JMeter, Gatling, Neustar, Neoload, Blaze Meter, Perfmon, nMon, HP SiteScope, Shunra, LISA, JVisualVM, HP Diagnostics, AppDynamics, Dynatrace, Hyperformix

API – POSTMAN, SOAP UI, GreenHat, JMeter

Programming – Java, Python, C#, Shell Script, Power Shell Script, DOS Batch Script, VB Script, Java Script, PIG

Database – MS-SQL Server, Oracle 10, MySQL, Postgres SQL, Hive, Mongo DB

Verticals

Retail, BFSI, Manufacturing, Shipping Logistics, Health Care & Life Science

Work Experience – Key Highlights of my 5+ years' journey in Zensar

Zensar Technologies – Group Manager, Delivery From June' 2018 – till Date

- Collaborate with Old Mutual Transformation Sponsors and Test CoE Stakeholders to implement End to End Test Automation, Digital Transformation, SDET implementation in Agile Methodologies across the BAU
- 20-30% reduction in testing life cycle through open source automation, Digital, Performance and security Testing
- Introduced and Enhanced the Automation CoE, Performance CoE, Security Testing, Mobile & Digital Testing, Disaster Recovery Coordination, Domain Reusable Test Cases, IV&V Test consultancy, etc.
- Define, Build & Rollout Test processes with CI/CD integration with enhanced metrics, governance & compliance
- Collaborate with JM Transformation Sponsors and Test CoE Stakeholders to transform from waterfall methodologies to Agile Methodologies
- SDET implementation in Agile sprint
- Established Agile delivery model co-working with Test Management Office. Defining the Agile way of working and workshop/mentor the team to adopt new ways of work
- Efficiently managed high demanding business seamlessly and set up value driven delivery model
- 40% reduction in testing life cycle through open source automation
- Setting up knowledge management framework
- Spearheaded new solution for TMMi based maturity model and value-based delivery to ensure 30% savings to customer in 3 years
- Setting up 40:60 Dual shore model (from 100% onshore) and implemented n-1 rotation to increase gross margin by 50%
- Attaining 100% resource utilization to reduce effective Testing Capability cost by almost ~23%
- Performed Due Diligence and AS IS analysis of the JM Testing CoE and defined the future roadmap and strategy for Testing CoE
- Create Transformation deliverables specifically aligned to Client stakeholder expectations (V-Model to Hybrid Agile and futuristic pure Agile)
- Project Delivery Deep-dive in-order to recommend process streamlining and optimization of SOP in order to deliver on-time with better quality by increasing higher test coverage using prioritization
- Introduced and Enhanced the Automation CoE, Performance CoE, Security Testing, Mobile & Digital Testing, Disaster Recovery Coordination, Domain Reusable Test Cases, IV&V Test consultancy, etc.
- Define, Build & Rollout Test Life Cycle delivery TCoE processes with enhanced metrics & governance

Zensar Technologies – Senior Practice Manager (Solution Provider, Capacity Building, Capability Building) From Oct' 2014 – May' 2018

- Build Performance Testing & Engineering, Application Security, Digital Testing Solution, Team and Capability
- Providing Testing Solution, framework, strategy for Functional and non-functional testing
- Build and streamline CI/CD and Continuous Automation (CA) for 10+ customers
- Build scalable testing model for Managed & Shared Services and delivers all non-functional testing across the delivery
- Build Test Labs, TCOE, RnD Teams and Infrastructure
- Represented Zensar as the co-speaker at 4th Agile Global conference at Hyderabad
- Build Testing solution Engaging with Industry Analyst – Gartner, Everest for vendor briefings and solution overview to enable Zensar future readiness
- Establishing continuous learning culture as part of Testing Practice initiative
- Part of strategic initiative to increase Testing Practice pool utilization and consistently maintained utilization between 92% to 100%
- Provided Testing solution, approach to pre-sales counter part as part of RFP/RFI response across the globe

Bank of America – Lead Analyst (Performance Engineer Leadership, Mobile Automation Leadership)
From Feb’ 2010 to July’ 2014

- Built Mobile Test Lab for Automation, Performance and Security for two delivery centres
- Identify right tools for different type of testing
- Provides the test architectural solution and road map for critical financial/banking application from Application Security and Performance Engineering Aspect
- Managed 100+ testing team.
- Provide Solution through R&D and innovation.
- Advise and work on best practice performance engineering with PT and App Dev Team.
- Identify and adopt new testing tools for all test management and execution activity.
- Handling ALM Environment (QC, PC, QTP), Introscope, Dynatrace, HP Site Scope, Mobile Lab (Perfecto, Device Anywhere, Monkey Talk), Multi Browser Lab on Private cloud
- Administrator of Performance Test Lab, HP Diagnostics Lab and ITKO Lisa consists of 900 + servers
- Jarvis – Developed a tool to provide Operational activities of Test lab (900 servers) using J2EE, VB Script, DOS PowerShell Script, Java Script
- Developed Mobile App Automation framework using Selenium-Appium and Monkey Talk
- Implementing Mobile App Security capability and internal team for day to day operation
- As part of innovation team, developed Big Data capability using opensource Hadoop and delivered two Hadoop project from offshore during 2010
- Build Testing capabilities for Hadoop cluster performance and scalability

Information Dynamics – Project Lead (ADF & J2EE) From July’ 2019 to Jan’ 2010

- Architect design, validating HLD, LLD.
- Implemented velocity conversion to convert Oracle form based 2 tier application into J2EE web-based application using oracle ADF, BC4J framework.
- Implemented Q&E framework using JUNIT, eclwma, JReport, PMD, QTP, JMeter, JProbe
- Implemented and mentored team for application performance testing and engineering using JMeter and HP Java Probe/Profiler.

Manpower & RNTBCI – Lead (J2EE Architect, Build & Deployment)

Manpower – From Jan’2008 to March’ 2008 & RNTBCI – From March’ 2008 to June’ 2009

- Worked as J2EE architect for technology team to review and providing recommendation on all new application
- Developed a plug-in tool for Eclipse, RAD and WSAD to prepare Java Doc comment.
- Developed web application testing tool and session management tools.
- Worked as part of global Technical core team
- Build a new J2EE framework named SAJ framework based on Struts framework to reduce the development effort
- Bring 11 J2EE new project to India centre from France office to India RNTBCI office in on week effort

Covansys India Pvt. Ltd. Team Lead (From June’ 2005 to Jan’ 2008)

- Developer and Architecture for US state govt. (Michigan, New York) for retirement and election system.
- Architect for Ford – vehicle tracking system from ordering to delivery.
- Part of recruitment board for Chrysler for their Dubai based IT development centre
- Certified Trainer for ASSET and Lead a team of 28.
- Vendor resource award Felicitated by FORD India director for successfully delivering a complicated and high visibility project

SMC Information Technologies, Team Lead (From April’ 2001 to June’ 2005)

- Develop as per design and Unit test on development box
 - Coach to new Joiners
 - Technology used – MFC, VB6.0, ASP, MS – SQL Server, Java, J2EE
 - Part of .Net Beta evaluation team invited by Microsoft
 - Develop Mobile gateway for Banking customer
-

NIIT Ltd., System Administrator (From Jan’ 2000 to March’ 2001)

- Managed 12 NIIT franchise Training centre being part of NIIT Ltd. Network team.
- Supported Sco UNIX and Windows NT based network

Education	Hons. Graduate in Commerce (Calcutta University)	1992
	GNIIT – 3 Years Diploma course equivalent. Of MCA (NIIT Ltd.)	2000
Certification	SCJP
